PROFILE

A Computer Science and Engineering undergraduate at Aditya College of Engineering, Madanapalle With expertise in Java, Python and web development, I aim to build innovative solutions for real-world problems

EXPERIENCE

AI – Data Quality Analyst Internship Training
10/02/2025-20/05/2025

- Completed internship focused on data quality analysis using AI-driven tools and techniques.
- Gained practical experience in data cleaning, validation, and anomaly detection.
- Improved data integrity by identifying and resolving inconsistencies in real-world datasets

PROJECTS

REAL-TIME SMART ATTENDANCE MONITORING SYSTEM WITH FACE RECOGNITION USING COMPUTER VISION & DEEP LEARNING

- Built a smart attendance system using facial recognition and real-time student tracking.
- Logged entry, exit, and duration data automatically.
- Generated detailed reports to support faculty oversight and decision-making.

Student Performance Analysis Dashboard

- Built a Power BI dashboard to analyze student performance data (attendance, grades, trends).
- Designed visuals and KPIs to support data-driven decisions.
- Applied data cleaning, modeling, and visualization techniques.
